

George Carl Yana Mbome

Senior Software Engineer

Douala, Cameroon | +237 696 740 298 | georgecvr10@gmail.com | github.com/cvrlnolan

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years building full-stack systems (TypeScript, Python) at Invisible Technologies — 600+ merged pull requests across 11 repositories — plus a part-time contract at Lemonet (141 merged PRs) and 7+ years of freelance and startup engineering experience spanning billing, marketplace verification, payments, admin tooling, and e-commerce products. Proven ability to take any product idea from architecture through deployment and scale it.

PROFESSIONAL EXPERIENCE

Invisible Technologies — Senior Software Engineer — Remote *Dec 2021 – Present*

- Shipped 600+ merged pull requests (1,100+ commits) across 11 repositories in TypeScript and Python over 4+ years, ranking as a top-2 individual contributor on the core backend platform.
- Built the expert verification & assessment platform end-to-end, including Neo4j-backed verification services, fraud-detection checks, and AI-assessment integrations (WECP, Hallo AI), while sustaining 59% automated test coverage across 300+ commits.
- Engineered core billing and invoicing infrastructure (235 merged PRs) for Invisible's flagship process-automation product, including a time-log-based billing engine and the step-execution logic behind the visual process builder.
- Designed an opportunity-application and auto-shortlisting system that streamlined expert-to-role matching, supporting a platform used by enterprise clients including Meta, Apple, Amazon, and xAI.

Lemonet — Software Engineer (Part-Time Contract) — Remote *Jun 2025 – Apr 2026*

- Delivered 141 merged pull requests building core admin surfaces — a webmaster partner portal, leadership/fulfillment/team-performance dashboards — and Stripe-based subscription billing and cancellation logic; ranked the 4th most active contributor of 13 on the company's monorepo.
- Designed and scaled a self-hosted GitHub Actions runner fleet and resolved a recurring CI build-cache regression, documented in the team's build-performance runbook.

Certified Upwork Freelancer — Software Engineer — Remote *Feb 2019 – Present*

- Delivered full-stack web applications for international clients with a 100% job success score, using React, TypeScript, Next.js, Tailwind CSS, Python, and FastAPI.
- Owned projects end-to-end from architecture through deployment, building PostgreSQL- and MySQL-backed applications for startups and small businesses.

Tirla Technologies — Software Engineer — Douala, Cameroon *Aug 2018 – Feb 2019*

- One of two engineers at an early-stage startup; built and delivered multiple client web projects using WordPress, React, Node.js, and Express.

Coredoo — Software Engineer — Douala, Cameroon *Jun 2017 – Jul 2018*

- Core engineer on Coredoo's food delivery web app, building the product from the ground up with HTML, CSS, JavaScript, and PHP (CodeIgniter, Laravel).

Port Authority of Douala — Engineering Intern — Douala, Cameroon *Jul 2017 – Sep 2017*

- Built a Document Management System as the primary intern project and resolved engineering tickets across existing PHP, MySQL, and Oracle applications.

EDUCATION

B.Sc. Software Engineering, Catholic University Institute of Buea 2014 – 2018

SKILLS

Languages: JavaScript, TypeScript, Python, PHP

Frontend: React, Next.js, Tailwind CSS, Material UI, HTML5/CSS3, GraphQL, REST APIs, WebSockets

Backend: Node.js, Express, Django, FastAPI, GraphQL, Kafka, REST

Databases: PostgreSQL, MySQL, MongoDB, Redis, Neo4j, Oracle DB

DevOps & Testing: Docker, Kubernetes, Helm, Argo CD, GitHub Actions, Vercel, Jest, Pytest, Cypress, Playwright
